Project Part 7 — CURSOR FOR LOOP and %ROWTYPE

Question 1:

Run script 7northwoods in schemas des03

Using CURSOR FOR LOOP syntax 1 in a procedure to display all the faculty member (f_id, f_last, f_first, f_rank), under each faculty member, display all the student advised by that faculty member

(s_id, s_last, s_first, birthdate, s_class).

Question 2:

Run script 7software in schemas des04

Using %ROWTYPE in a procedure, display all the consultants. Under each consultant display all his/her skill (skill description) and the status of the skill (certified or not)

Question 3:

Run script 7clearwater in schemas des02

Using CURSOR FOR LOOP syntax 2 in a procedure to display all items (item_id, item_desc, cat_id) under each item, display all the inventories belong to it.

Question 4:

Modify question 3 to display **beside** the item description the value of the item (value = inv_price * inv_qoh).
